## (2). What is HTTPS/SSL Update?

Ans:

An "HTTPS/SSL Update" usually refers to one of three specific actions taken to secure a website. It is not a single software patch, but rather a process of maintaining the security "passport" of a website.

To understand this, we first need to clarify the terms:

- **HTTPS (Hypertext Transfer Protocol Secure):** The secure channel for sending data.
- **SSL (Secure Sockets Layer):** The old technology used to create that channel.
