

Google Analytics & Tag Manager

Complete Question & Answer Guide

Q1. What are Events in Google Analytics?

Events in Google Analytics are user interactions with your website or app that can be tracked independently from a web page or screen load. They allow you to measure specific actions users take beyond simple page views.

Types of Events:

Event Type	Description	Example
Automatically Collected	Tracked by default without extra code	first_visit, session_start
Enhanced Measurement	Enabled via GA4 settings	scroll, file_download, video_play
Recommended Events	Predefined by Google for specific use	asespurchase, login, sign_up
Custom Events	Defined by you for unique interactions	button_click, form_submit

Each event has parameters (additional data):

- **event_name** — Name of the action (e.g., button_click)
- **event_category** — Group of events (e.g., Videos)
- **event_label** — Specific identifier (e.g., Play Button)
- **event_value** — Numeric value associated with the event

Q2. Connect Website/Blog to Search Console, Analytics & Tag Manager — Add Faculty as User

Step A — Google Search Console

Users (2)			
Name ↑	Email	Permission	
AMIT CHAVDA (you)	amitchavda628@gmail.com	Owner Verified ?	⋮
sanket.tops	sanket.tops@gmail.com	Restricted	⋮
Rows per page: 10			1-2 of 2 < >

Step B — Google Analytics (GA4)

AC GROUPS > AC GROUP			Property access management 2 rows	Search		
☐	Name ↑	Email	Roles and data restrictions ⓘ			
☐	AMIT CHAVDA	amitchavda628@gmail.com	Administrator			
☐	sanket.tops@gmail.com	sanket.tops@gmail.com	Viewer			

Step C — Google Tag Manager (GTM)

AC GROUP > budgetfriendlytour.blogspot.com			Container permissions 2 rows	Search		
☐	Name ↑	Email	Permissions ⓘ	User status ⓘ		
☐	AMIT CHAVDA	amitchavda628@gmail.com	Publish	✓	Has access	
☐	sanket.tops@gmail.com	sanket.tops@gmail.com	Read	🕒	Invitation pending	

Q3. Submit Sitemap and robots.txt in Search Console

Submitting Sitemap:

Submitted sitemaps						
Sitemap	Type	Submitted ↓	Last read	Status	Discovered pages	Discovered videos
/sitemap-pages.xml	Sitemap	Feb 14, 2026	Feb 14, 2026	Success	2	0
/sitemap.xml	Sitemap	Feb 14, 2026	Apr 9, 2026	Success	20	0

robots.txt File:

Custom robots.txt

User-agent: * Disallow: /search Disallow: /category/ Disallow: /tag/ Allow: /

Sitemap: <https://budgetfriendlytour.blogspot.com/sitemap.xml> Sitemap:

<https://budgetfriendlytour.blogspot.com/sitemap-page>

Q4. Submit User Flow and Traffic Source Reports

User Flow Report:

https://drive.google.com/file/d/1H3JIQrI8_e71rHu0g5ObDmzcwzly72fO/view?usp=sharing

Traffic Source Report:

<https://drive.google.com/file/d/1c7FyXgEmbzwrvRiKNtf4GQTgGGpybuNr/view?usp=sharing>

Q5. Connect Blog to Google Analytics — Study Traffic Types

Connecting Blog to Google Analytics:

Stream details 			
STREAM NAME	STREAM URL	STREAM ID	MEASUREMENT ID
AMIT	https://budgetfriendlytour.blogspot.com	14386330588	G-2E6C8ZSY9R 

Types of Traffic in Google Analytics:

Traffic Type	Source	How to View
Organic Search	Google, Bing, Yahoo (unpaid)	Acquisition → Traffic Acquisition
Direct	User typed URL directly or bookmarked	Acquisition → Traffic Acquisition
Referral	Links from other websites	Acquisition → Traffic Acquisition
Social	Facebook, Instagram, Twitter, etc.	Acquisition → Traffic Acquisition
Email	Email campaigns with UTM tags	Acquisition → Traffic Acquisition
Paid Search	Google Ads, Bing Ads	Acquisition → Traffic Acquisition
(Other)	Unclassified or custom channels	Acquisition → Traffic Acquisition

Q6. Create a Goal and Study Whether It Has Been Completed

In GA4, Goals are called **Conversions**. They measure whether users complete a desired action.

How to Create a Goal/Conversion in GA4:

Events can be used for Google Analytics reporting and advertising purposes. New events can be marked as key events. Events used for conversions will be automatically marked as key events. [Learn more about event creation](#)

Provide an event name that indicates what it is being measured

AMIT

Mark as key event

Key events are the events that are important to your business, such as a purchase or a newsletter sign-up. They will be displayed in the events and key events report.

Choose how to create an event

Create without code

Create an event that can be detected by your Google tag without adding any code to your website.

Summary of your new event:

Data stream

budgetfriendlytour

Event name

AMIT

Event criteria

event_name equals page_view

page_location contains (ignore case) https://budgetfriendlyt...

[Edit event configuration](#)

Create with code

Provide the name and install code on your website or app to identify the event that you want to measure.
